PROFESSIONAL SUMMARY

Frontend Engineer with 4+ years of experience building responsive, reusable interfaces using React, Next.js, TypeScript, JavaScript and Tailwind CSS. Currently contributing to a 5-person engineering team at Probuilt Football, delivering production-ready pages and reusable UI components from design through testing and deployment. Experienced with REST APIs, authentication, SQL, Git workflows and continuous deployment on Vercel and Netlify. Completed the CFGDegree in Full-Stack Development (Code First Girls) with Merit (88%), with a strong focus on problem solving, continuous learning and modern web development.

EXPERIENCE

Frontend Engineer | Probuilt Football, UK | *Oct 2025 – Present*

- Built and delivered 5+ production-ready pages for Probuilt, a football coaching platform for players and coaches, as part of a 5-person engineering team using Next.js, TypeScript and Tailwind CSS.
- Built all of the platform's reusable UI components (4+), ensuring consistent design and code reuse across pages.
- Converted Figma designs into responsive, production-ready interfaces, focusing on component reusability, visual consistency and maintainable code.
- Created and maintained GitHub Wiki documentation covering frontend architecture, folder structure, component organisation, naming conventions and front-end development guidelines.
- Took ownership of accessibility, testing interfaces across screen sizes and validating spacing, alignment, responsiveness and visual consistency before release.
- Used Git-based team workflows for version control, collaboration and code review.

Front End Developer | Freelance, UK | *Nov 2023 – Oct 2025*

- Designed and built 4+ responsive websites for small-business owners (client details confidential), using React, JavaScript (ES6+), HTML5, CSS3, TypeScript and Tailwind CSS.
- Deployed projects on Netlify using continuous deployment from GitHub, with optimised builds, asset compression and caching strategies.
- Built reusable React components and implemented client-side routing and application state across projects, improving code reuse and maintainability.
- Managed source control with Git and GitHub workflows, applying branching strategies and pull-request reviews to improve code quality.
- Used AI-assisted development tools including GitHub Copilot and ChatGPT for debugging, refactoring and optimisation to improve code quality and development efficiency.

Junior Front End Developer | Infocus Consultants Limited, UK | *Apr 2022 – Oct 2023*

- Developed interactive web interfaces using React and JavaScript, translating design requirements into functional and user-friendly features.
- Built and maintained reusable UI components, including headers, footers, buttons, cards, and forms, ensuring consistency across application pages.
- Implemented responsive layouts using Tailwind CSS, ensuring components and pages adapt smoothly to mobile, tablet, and desktop screen sizes.
- Managed frontend code using Git and GitHub, creating feature branches, committing changes, raising pull requests, and resolving review feedback before merging updates.
- Participated in team meetings and code reviews, discussing implementation approaches, reviewing code changes, and incorporating feedback to improve code quality and maintainability.

Salesforce Administrator | Infocus Consultants Limited, UK | *Mar 2021 – Mar 2022*

- Managed user access permissions and security settings for 150+ users using Profiles and Permission Sets, ensuring data security and appropriate role-based access.

- Automated internal workflows using Workflow Rules and Process Builder, improving operational efficiency and reducing onboarding time by streamlining permission management.
- Supported system maintenance and troubleshooting, reducing permission-related support requests and improving team productivity.

Career break: maternity leave (Aug 2019 to Mar 2021)

Earlier Career | UK and India | *Jul 2012 – Aug 2019*

- Science Technician at multiple UK secondary schools (2015 to 2019): managed lab operations, prepared equipment, and supported practical experiments, resulting in efficient lesson delivery and improved student engagement.
- Research Assistant at National Institute of Occupational Health, India (2012 to 2015): coordinated sample collection, maintained research data, and contributed to occupational health analysis supporting workplace safety recommendations.

SKILLS

Frontend: React | JavaScript (ES6+) | TypeScript | HTML5 | CSS3 | Tailwind CSS | Next.js | Redux | Responsive Design

Backend & APIs: Node.js | Express.js | REST APIs | Authentication | SQL | SQLite | Firebase | OpenAI API | Serverless

Testing: Jest | Vitest | React Testing Library

Tools & Deployment: Git | GitHub | Vite | npm | Netlify | Vercel | Railway | Continuous Deployment

Development: Agile | Scrum | Figma | Jira | Accessibility (WCAG) | AI-assisted Development (GitHub Copilot, ChatGPT)

PROJECTS

Curio | **AI-Powered Kids Discovery App** | React, Vite, Tailwind CSS, Node.js, OpenAI API, Vercel

OpenAI Codex Hackathon Project | Demo: https://curio-nu-jet.vercel.app/ | GitHub: https://github.com/PrakrutiPareek/Curio

- Built and deployed a responsive AI-powered app generating age-appropriate educational content and science activities for children based on user inputs.
- Integrated OpenAI API with structured JSON responses, validation, retry handling and safety filtering for child-friendly responses.
- Migrated an Express backend to Vercel Serverless Functions, resolving production deployment, environment variable and third-party library issues.

JobEase | **Full-Stack Job Application Tracker** | React, Node.js, Express, SQLite, Firebase, Adzuna API

CFGDegree Group Project | Demo: https://job-tracker-app-beige-theta.vercel.app/ | GitHub: https://github.com/PrakrutiPareek/job-tracker-app

- Built a full-stack job application tracker with authentication, job search, application management and external API integration.
- Developed application UI, validation, API endpoints, routing, testing and project documentation in an Agile/Scrum team, contributing to sprint planning, stand-ups and code reviews.
- Deployed frontend on Vercel and backend on Railway with persistent SQLite storage for production data.

CERTIFICATIONS AND PERSONAL DEVELOPMENT

- **CFGDegree in Full-Stack Development** | Code First Girls | Jul 2026 | Merit (88%)
  16-week intensive programme covering JavaScript, TypeScript, React, Redux, Node.js, Express.js, REST APIs, SQL and Jest, with Agile/Scrum team projects.
- **Data and SQL Kickstarter** | Code First Girls | Sep 2026
- **NCFE Level 2 Certificate in Understanding Coding** | NCFE | May 2026

EDUCATION

- **Gujarat University, India** | *Jul 2012* | Master of Science, Biochemistry | 73.45%
- **St. Xavier's College, India** | *Apr 2010* | Bachelor of Science, Biochemistry | 66.19%
